## CENTRAL INTELLIGENCE AGENCY

## ATTACHMENT 3

## PLANNED HOG REPRODUCTION FOR 1951

(The reproduction rate is reckoned according to the following key: It is assumed that 85 per cent. of the total number of sows at any given time will farrow, and the plan assumes two litters per year. The number of pigs in a litter is estimated at 6.3 from May through July, at 6.5 from August through September, and at 5.8 from October through December. For example, 85 per cent. of the January number of sows multiplied by 6.3 will give the number of suckling pigs in May.)

Land	May	June	July	August	September	October	November	December	Total
Brandenburg	60,041	85,340	97,310	140,225	175,695	129,381	142,593	122,322	953,907
